- User authentication
- Testing frameworks
- Agile Development
- People-oriented
- Customer service
- Strong work ethic
- Divergent thinking
- Effective collaboration
- Personal accountability

Education

📅 2022
Web Development | Bootcamp
CareerFoundry
- Acquired knowledge on how to build functional full-stack web applications.
- MERN stack development and UI development.
- Design and accessibility principles.
- Testing tools (Jest, Cucumber, Puppeteer).

📅 2021
Kinesiology | Bachelor's Degree
University of Calgary
- Acquired extensive knowledge on health, wellness, nutrition, exercise and performance psychology.
- Achieved a 3.74 GPA across degree.

Please check out portfolio website linked at the top for more information about myself and my projects.

Projects

AvengersFlix
https://avengersflix.netlify.app
- Intensive project-based training with a focus on building a client-side application and a server-side RESTful API.
- Developed a full-stack web app, by connecting data on the REST API with user actions on the webpage.
- Used MongoDB for the database, NodeJS and ExpressJS to build the backend, and ReactJS to build the frontend. Styled using React Bootstrap.

Meet
https://charangautam.github.io/meet
- Intensive project-based training with a focus on building an application using the test-driven development (TDD) approach.
- Created a progressive web application (PWA), by creating a serverless API that connects to a calendar and utilizes this data on the webpage.
- The backend is serverless, hosted on AWS Lambda and connected to the Google Calendar API. The frontend is built using ReactJS and Bootstrap.
- Unit, integration, acceptance and end-to-end tests are implemented using jest, cucumber and puppeteer.

Work Experience

📅 2018 – 2021
Sales Associate
SBe Wholesale Flowers
- Drove sales through engagement with customers, suggestive selling, and sharing product insights.
- Worked directly with a team to discuss daily/weekly objectives and customer experience improvements.
- Trained new employees in their roles.
- Enhanced productivity through suggestion of delivering pre-ordered goods to customer's cars during a meeting.
- Matched or exceeded sales every holiday period.

Leadership Experience

📅 2019 – 2021
Co-Founder
Elite Coders
- Strived to develop social programming skills that are transferable to a work setting.
- Recruited a team of likeminded programmers.
- Coached members and organized practices.
- Contributed to the development of three full-stack web applications in a remote environment.
